CREATE (Main focus)

After a thorough but efficient preparation period, our team will create Cricket Sports betting webapp.

We will build with the focus on:

- Easy webapp onboarding
- List of sports and players
- Live Scores
- Betting Guides
- Players Details
  Crowd favourite
- Betting model selection
- Result Tabs
- Instant payment
- Push-Notification

attributes: Name, Password, Email, Phone

Develop (additional tools needed for solution)

Through clear communication and regular meetings with you, we will develop (web app platform like lotus365).

We will take industry trends and your unique needs into consideration to ensure that (the product) will fit your goals and serve your businesses.

Hardware and Software technology requirement

To provide the solution client need, we will use:

Programming language:

- **JavaScript**
- **CSS**
- **Html**
- **React + Node js**

Database:

- **MongoDB / SQL**

Cloud Environment:

- **It's on client server side**

NOTE: There is also need of Third-party APIs which we will provide.

Estimate of Cricket Sports Betting WebApp Development Cost

UI / UX Design	**rs. 75,000**
Project management	**rs. 50,000**
Testing	**rs. 60,000**
Admin Panel Back-end part	**rs.1,00,000**
API Integration	**rs.65,000**
Total Cost	**rs.3,50,000 + GST/.**

Total Cost of API will be p ovided by client side **API provider:** **-Bet365 -nux gaming** **-Rapid and many more**	

Additional:

Real time Cricket sports Betting APIs Cost its all on monthly and yearly basis.

Cricket betting APIs cost: $74 to $149 per month. Some slots games and bingo types of games can make additional charges, but we will try to not to.

Sports APIs

- **Cricket: $74 to $ 149 per months**

NOTE: As mentioned above the plan, cost can be change if you consider Annual packages

In the starting months you can go as minimum as possible according to APIs hits and after that you(we) can upgrade it according to traffic.
